

Mangesh Bhattacharya

Cybersecurity Engineer | Cloud Security (AWS & Azure) | AI Threat Detection | DevSecOps

Toronto, ON, Canada | (416) 670-1418 | mangesh.bhattacharya@ontariotechu.net | linkedin.com/in/mangesh-bhattacharya | github.com/Mangesh-Bhattacharya

PROFESSIONAL SUMMARY

Cybersecurity Engineer and MITS-AI graduate student in Canada's first AI-in-Security program, specializing in AI-driven threat detection, cloud security, and DevSecOps automation. Built ML-based intrusion detection achieving 90%+ accuracy, an AI malware classifier that cut detection time by 35%, and automated threat-intelligence pipelines that reduced manual review by 40%. Hands-on across SOC, penetration testing, SIEM/SOAR engineering, and Zero-Trust architecture on AWS and Azure.

TECHNICAL SKILLS

Cloud & DevSecOps: AWS (IAM, VPC, EC2, S3), Microsoft Azure, Zero Trust Architecture, Docker, Ansible, CI/CD, GitHub Actions, SOAR

AI & Threat Detection: Machine Learning (TensorFlow, Scikit-learn), UEBA, Anomaly Detection, Malware Classification, Graph Neural Networks

Offensive Security: Burp Suite, OWASP ZAP, Nmap, FFUF, Nuclei, Wireshark, MITRE ATT&CK, OWASP Top 10 / CWE, CTF & Bug Bounty

Frameworks & Tools: SIEM (OpenSearch/ELK/Kibana), NIST, CIS, GDPR, Snyc, Trivy, Fluent Bit, Python, C++, Bash, Git

PROFESSIONAL EXPERIENCE

DevSecOps Engineer

Jan 2026 – May 2026

Upwork · Freelance — Toronto, ON — Remote

- Built automated vulnerability-scanning pipelines that accelerated detection workflows and expanded coverage across client applications and cloud environments.
- Delivered clear, actionable remediation reports with reproducible steps, enabling clients to resolve issues efficiently and strengthen security posture.
- Partnered with development teams to prioritize fixes and reduce average time-to-patch across CI/CD pipelines.

Cybersecurity Engineer

Aug 2025 – Nov 2025

Upwork · Permanent Part-time — Toronto, ON — Remote

- Architected production-grade UEBA using heuristic analysis and machine learning for real-time anomaly detection.
- Designed adversarial emulations leveraging MITRE ATT&CK frameworks to test EDR/XDR solutions.
- Engineered end-to-end SOAR workflows with Python and TensorFlow to accelerate Mean Time to Detect (MTTD) and Mean Time to Respond (MTTR).

Cybersecurity Observability & AI Engineer

Dec 2024 – May 2025

Ameya Data Solutions · Co-op — Mississauga, ON — Hybrid

- Designed and deployed AI-powered threat detection and observability systems, enhancing SOC visibility and reducing false positives.
- Built real-time monitoring pipelines integrating SIEM, IDS, IPS, EDR, and cloud telemetry for automated incident response.
- Strengthened AWS cloud security via IAM policy design, VPC segmentation, and Zero-Trust architecture aligned with NIST, CIS, and GDPR.

DevSecOps Engineer

May 2024 – Aug 2024

Ameya Data Solutions · Co-op — Mississauga, ON — Remote

- Developed AI-enhanced EDR tools using Python, Snyc, and Trivy to automate CVE-level threat response.
- Designed and enforced AWS security groups, IAM policies, and VPC architectures aligned with NIST and GDPR standards.

Data Analyst Intern

Aug 2023 – Dec 2023

Ameya Data Solutions · On-Call — Mississauga, ON — Remote

- Designed and implemented AWS security groups to monitor application traffic and improve compliance visibility.
- Automated security configuration and deployment workflows using Ansible playbooks and Docker.

EDUCATION

Master of Information Technology Security, Artificial Intelligence (MITS-AI) — Ontario Tech University | Sep 2025 – Apr 2027

Honours Bachelor of Information Technology, Cybersecurity — Seneca Polytechnic | May 2021 – Aug 2025

Engineering Diploma, Computer Systems Networking and Telecommunications — Humber Polytechnic | Sep 2018 – May 2021

CERTIFICATIONS

Industry & Vendor: (ISC)² Candidate (ISC2) • Certified Ethical Hacker (CEH, Cisco) • Microsoft Certified: Azure Fundamentals • CCNA (Cisco) • CCSK (Cloud Security Alliance) • IBM AI Engineering Professional Certificate • PCEP-30-01 • Google IT Automation with Python

TryHackMe Paths: Security Engineer, Offensive Pentesting, Red Teaming, DevSecOps, Advanced Endpoint Investigations, Jr. Penetration Tester, Pre Security, Advent of Cyber 2025
