

Mangesh Bhattacharya

Cybersecurity Engineer | Cloud Security (AWS & Azure) | AI Threat Detection | DevSecOps

Toronto, ON, Canada | (416) 670-1418 | mangeshb20@gmail.com | linkedin.com/in/mangeshbhattacharya | github.com/Mangesh-Bhattacharya

PROFESSIONAL SUMMARY

Cybersecurity Engineer and MITS-AI graduate student specializing in AI-driven threat detection, cloud security, and DevSecOps automation. Built ML-based intrusion detection achieving 90%+ accuracy, an AI malware classifier that cut detection time by 35%, and automated threat-intelligence pipelines that reduced manual review by 40%. Hands-on across SOC, penetration testing, SIEM/SOAR engineering, and Zero-Trust architecture on AWS and Azure.

TECHNICAL SKILLS

Cloud & DevSecOps: AWS (IAM, VPC, EC2, S3), Microsoft Azure, Zero Trust Architecture, Docker, Ansible, CI/CD, GitHub Actions, SOAR

AI & Threat Detection: Machine Learning (TensorFlow, Scikit-learn), UEBA, Anomaly Detection, Malware Classification, Graph Neural Networks

Offensive Security: Burp Suite, OWASP ZAP, Nmap, FFUF, Nuclei, Wireshark, MITRE ATT&CK, OWASP Top 10 / CWE, CTF & Bug Bounty

Frameworks & Tools: SIEM (OpenSearch/ELK/Kibana), NIST, CIS, GDPR, Snyk, Trivy, Fluent Bit, Python, C++, Bash, Git

PROFESSIONAL EXPERIENCE

Cybersecurity Analyst

Jan 2026 – Present

Race2Cloud Inc. — Toronto, ON

- Architected production-grade UEBA using heuristic analysis and machine learning, improving anomaly-detection precision by 28% and cutting false-positive alerts by 45%.
- Engineered end-to-end SOAR workflows with Python and TensorFlow, reducing Mean Time to Detect (MTTD) by 32% and Mean Time to Respond (MTTR) by 27%.
- Validated vulnerabilities in web/mobile apps with Burp Suite, OWASP ZAP, Nmap, and Nuclei, remediating 50+ critical/high findings aligned to OWASP Top 10 and MITRE ATT&CK.

DevSecOps Engineer (Freelance)

Aug 2025 – Jan 2026

Contra — Toronto, ON

- Built automated vulnerability-scanning pipelines that increased scan coverage by 60% across client applications and cloud environments.
- Reduced average time-to-patch across CI/CD pipelines by 38% by delivering actionable, reproducible remediation reports.
- Audited existing security controls, resolving 90% of critical findings within one sprint cycle to strengthen client security posture.

Cybersecurity Observability & AI Engineer

Dec 2024 – May 2025

Ameya Data Solutions — Mississauga, ON

- Designed and deployed AI-powered threat detection and observability systems, enhancing SOC visibility and reducing false positives.
- Built real-time monitoring pipelines integrating SIEM, IDS, IPS, EDR, and cloud telemetry for unified visibility and automated incident response.
- Strengthened AWS cloud security via IAM policy design, VPC segmentation, and Zero-Trust architecture aligned with NIST, CIS, and GDPR.

DevSecOps Engineer / Data Analyst Intern

Aug 2023 – Nov 2024

Ameya Data Solutions — Mississauga, ON

- Developed AI-enhanced EDR tools using Python, Snyk, and Trivy to improve vulnerability detection and automate CVE-level threat response.
- Deployed Fluent Bit and integrated logs into OpenSearch Dashboards (ELK Stack) for real-time visibility and forensic analysis.
- Automated security configuration, patching, and compliance checks using Ansible playbooks and Docker containerization.

EDUCATION

Master of Information Technology Security, Artificial Intelligence (MITS-AI) — Ontario Tech University | Sep 2025 – Apr 2027

Honours Bachelor of Information Technology, Cybersecurity — Seneca Polytechnic | May 2021 – Aug 2025

Engineering Diploma, Computer Systems Networking and Telecommunications — Humber Polytechnic | Sep 2018 – May 2021

CERTIFICATIONS

Pre Security (TryHackMe) • PCEP-30-01 Certified Entry-Level Python Programmer • Offensive Pentesting (TryHackMe) • Google IT Automation with Python (Google/Coursera) • Advent of Cyber 2025 (TryHackMe)
